Testing While Refactoring to Attributes

©2017 Chef Software Inc.

CHEF

Objectives

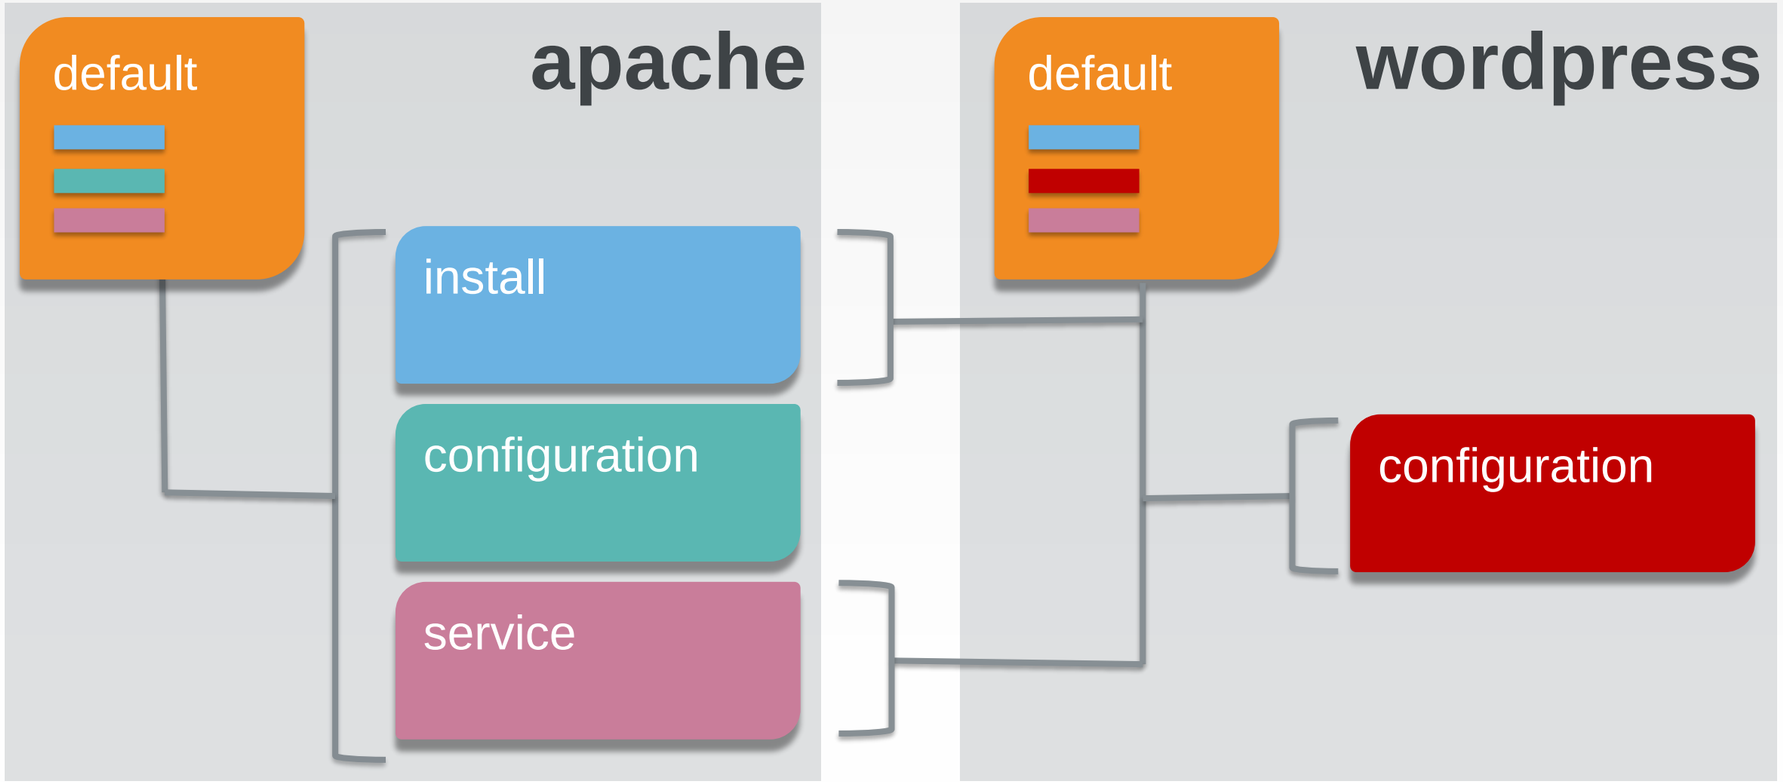
After completing this module, you should be able to:

- Refactor resources to use attributes
- Use Pry to explore the current state of execution
- Make changes to your recipes with confidence

©2017 Chef Software Inc.

CONCEPT

Modular Cookbook Recipes

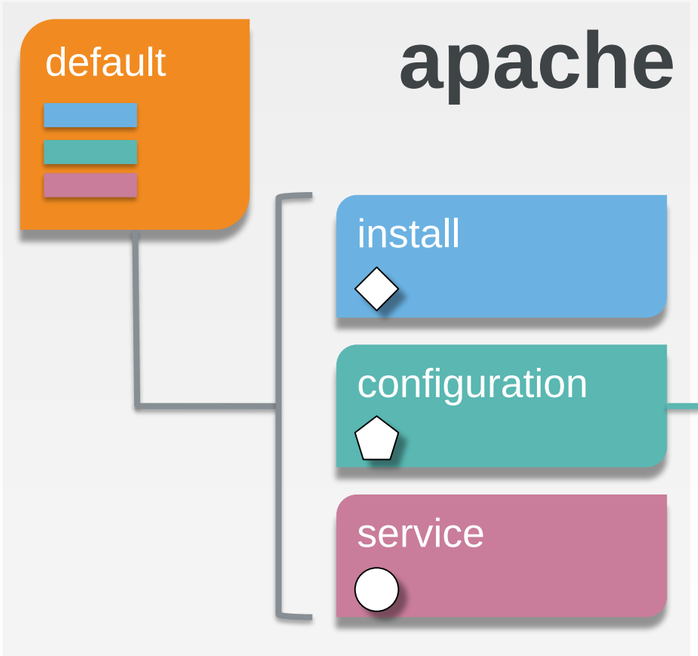


©2017 Chef Software Inc.

CHEF

CONCEPT

Modular Cookbook Recipes



~/apache/recipes/configuration.rb

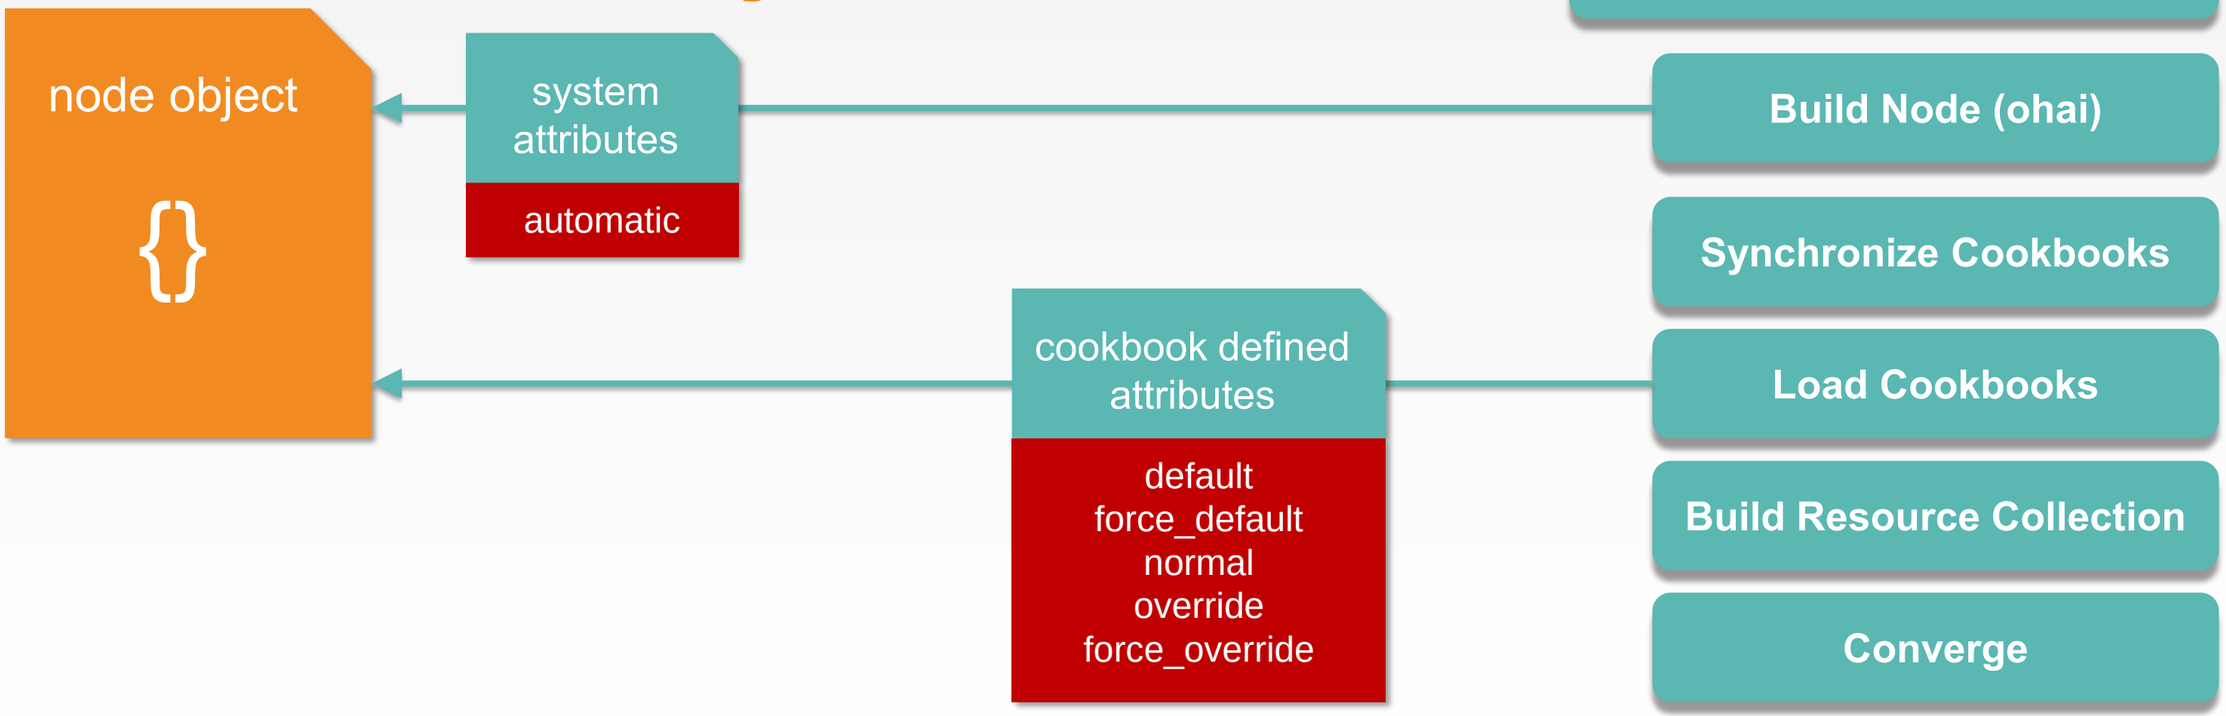
```
file '/var/www/html/index.html' do
  content '<h1>Welcome Home</h1>'
end
```

©2017 Chef Software Inc.

CHEF

CONCEPT

The Node Object

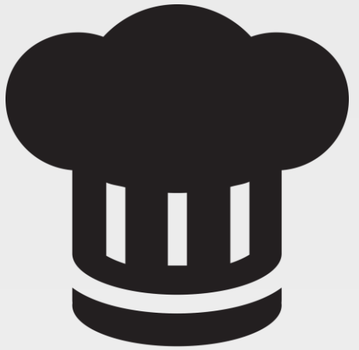


https://docs.chef.io/attributes.html - attribute-precedence

©2017 Chef Software Inc.

CHEF

EXERCISE



Refactor to Use Attributes

Time to remove all the hard-coded values and make them attributes.

Objective:

- ❑ Refactor the Install recipe to use a Node attribute
- ❑ Execute the tests and verify the tests fail
- ❑ Create the attributes file and add the Node attribute
- ❑ Execute the tests and verify the tests pass

©2017 Chef Software Inc.

CHEF

Replace the Value with a Node Attribute

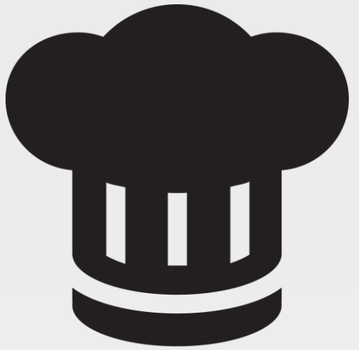
~/apache/recipes/install.rb

```
#
# Cookbook Name:: apache
# Recipe:: install
#
# Copyright (c) 2017 The Authors, All Rights Reserved.
package node['apache']['package_name']
```

©2017 Chef Software Inc.

CHEF

EXERCISE



Refactor to Use Attributes

A change means a chance for us to run the tests!

Objective:

- ✓ Refactor the Install recipe to use a Node attribute
- ❑ Execute the tests and verify the tests fail
- ❑ Create the attributes file and add the Node attribute
- ❑ Execute the tests and verify the tests pass

©2017 Chef Software Inc.

CHEF™

Execute the Tests to See it Fail

```
> chef exec rspec
```

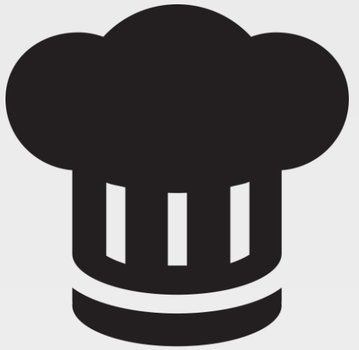
```
..FFFFFF...

Failures:

  1) apache::default When all attributes are default, on an Centos
6.9 converges successfully
     Failure/Error: expect { chef_run }.to_not raise_error

       expected no Exception, got #<NoMethodError: undefined
method `[]' for nil:NilClass> with backtrace:
         # /tmp/chefspec20180313-21260-
```

EXERCISE



Refactor to Use Attributes

We definitely broke it! Now, let's fix it.

Objective:

- ✓ Refactor the Install recipe to use a Node attribute
- ✓ Execute the tests and verify the tests fail
- ❑ Create the attributes file and add the Node attribute
- ❑ Execute the tests and verify the tests pass

CHEF

Ask Chef How to Generate an Attributes File

```
> chef generate attribute --help
```

```
Usage: chef generate attribute [path/to/cookbook] NAME [options]
    -C, --copyright COPYRIGHT        Name of the copyright hol...
    -m, --email EMAIL                Email address of the auth...
    -a, --generator-arg KEY=VALUE    Use to set arbitrary      ...
    -I, --license LICENSE            all_rights, apache2, mit,...
    -g GENERATOR_COOKBOOK_PATH,      Use GENERATOR_COOKBOOK_PA...
        --generator-cookbook
```

©2017 Chef Software Inc.

Use Chef to Generate a Default Attributes File

```
> chef generate attribute default
```

```
Compiling Cookbooks...
Recipe: code_generator::attribute
  * directory[/home/chef/apache/attributes] action create
    - create new directory /home/chef/apache/attributes
  * template[/home/chef/apache/attributes/default.rb] action
create
    - create new file /home/chef/apache/attributes/default.rb
    - update content in file
/home/chef/apache/attributes/default.rb from none to e3b0c4
    (diff output suppressed by config)
```

©2017 Chef Software Inc.

CHEF™

View the Attributes File Generated

```
> tree attributes
```

```
attributes
└── default.rb

0 directories, 1 file
```

©2017 Chef Software Inc.

CHEF

Add the Default Node Attribute

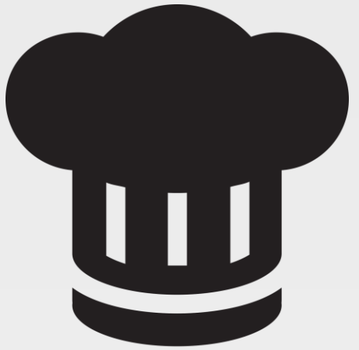
~/apache/attributes/default.rb

```
default['apache']['package_name'] = 'httpd'
```

©2017 Chef Software Inc.

CHEF

EXERCISE



Refactor to Use Attributes

The work is done. Let's hope it's the right work. Run the tests!

Objective:

- ✓ Refactor the Install recipe to use a Node attribute
- ✓ Execute the tests and verify the tests fail
- ✓ Create the attributes file and add the Node attribute
- ❑ Execute the tests and verify the tests pass

©2017 Chef Software Inc.

CHEF

Execute the Tests to See it Pass

```
> chef exec rspec
```

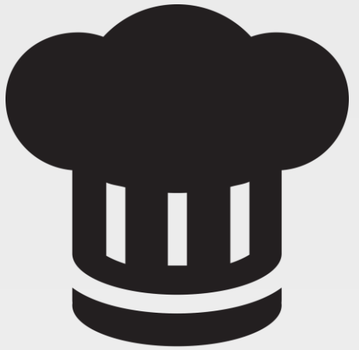
```
...........

Finished in 4.07 seconds (files took 3.93 seconds to load)
11 examples, 0 failures
```

©2017 Chef Software Inc.

CHEF

EXERCISE



Refactor to Use Attributes

We made a change and we know it works!

Objective:

- ✓ Refactor the Install recipe to use a Node attribute
- ✓ Execute the tests and verify the tests fail
- ✓ Create the attributes file and add the Node attribute
- ✓ Execute the tests and verify the tests pass

©2017 Chef Software Inc.

CHEF

PROBLEM

What if We Made a Typo?

While implementing the node attribute what if made a mistake?

©2017 Chef Software Inc.

CHEF

Typos Like This One Will Waste Time

~/apache/attributes/default.rb

```
default['apche']['package_name'] = 'httpd'
```

©2017 Chef Software Inc.

CHEF

CONCEPT

Mental Model vs Actual Model

Faster feedback helps us build a greater mental model of the actual execution model. Tests that we define help strengthen it. However, tests are not very interactive as they are more like experiments. What we want is the ability to pause execution and look around.

©2017 Chef Software Inc.

CONCEPT

Pry a Debugger

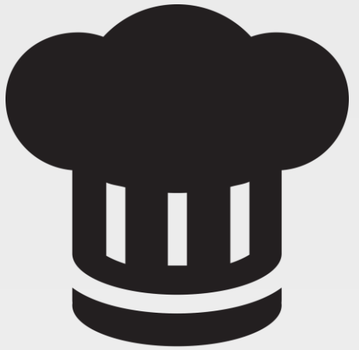
Pry is a Ruby debugger that allows you to define break points. These breakpoints allow you to pause operation and interact with the current process being able to interrogate the current state of the system.

http://pryrepl.org

©2017 Chef Software Inc.

CHEF

EXERCISE



Setup a Break Point

Time to make trouble for ourselves.

Objective:

- ❑ Mutate the code and add the breakpoint
- ❑ Execute the tests to cause the breakpoint to trigger
- ❑ Remove the breakpoint and restore the code

©2017 Chef Software Inc.

CHEF

Create a Typo in the Defined Attribute

~/apache/attributes/default.rb

```
default['apche']['package_name'] = 'httpd'
```

©2017 Chef Software Inc.

CHEF

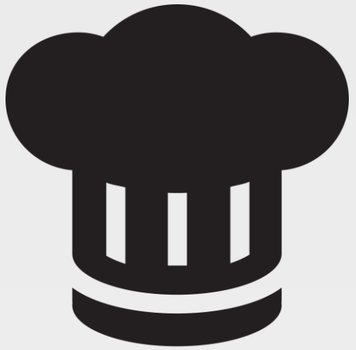
Add a Break Point in the Recipe

~/apache/recipes/install.rb

```
#
# Cookbook Name:: apache
# Recipe:: install
#
# Copyright (c) 2017 The Authors, All Rights Reserved.
require 'pry'
binding.pry

package node['apache']['package_name']
```

EXERCISE



Setup a Break Point

Time to pry into the code and see what it is going on.

Objective:

- ✓ Mutate the code and add the breakpoint
- ❑ Execute the tests to cause the breakpoint to trigger
- ❑ Remove the breakpoint and restore the code

©2017 Chef Software Inc.

CHEF

Execute the Test to Initiate Pry

```
> chef exec rspec spec/unit/recipes/install_spec.rb
```

```
From: /tmp/chefspec20180313-23174-

Execute Any Code As You Would in a Recipe

```
[2] pry(#<Chef::Recipe>)> node['apache']
```

```
=> nil
```

©2017 Chef Software Inc.

CHEF™

Explore the Different Node Attributes

```
[3] pry(#<Chef::Recipe>)> node['apche']
```

```
=> {"package_name"=>"httpd"}
```

©2017 Chef Software Inc.

CHEF™

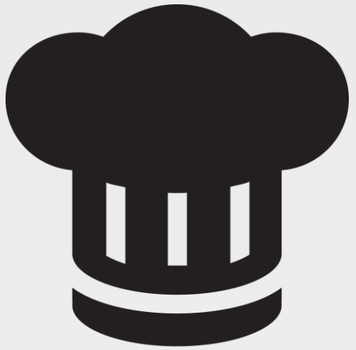
Halt the Execution of the Test Immediately

```
[4] pry(#<Chef::Recipe>)> exit!
```

©2017 Chef Software Inc.

CHEF

EXERCISE



Setup a Break Point

Time to pry into the code and see what it is going on.

Objective:

- ✓ Mutate the code and add the breakpoint
- ✓ Execute the tests to cause the breakpoint to trigger
- ❑ Remove the breakpoint and restore the code

©2017 Chef Software Inc.

CHEF

Remove the Break Point from the Recipe

~/apache/recipes/install.rb

```
#
# Cookbook Name:: apache
# Recipe:: install
#
# Copyright (c) 2017 The Authors, All Rights Reserved.
require 'pry'
binding.pry

package node['apache']['package_name']
```

©2017 Chef Software Inc.

CHEF

Fix the Change in the Attributes

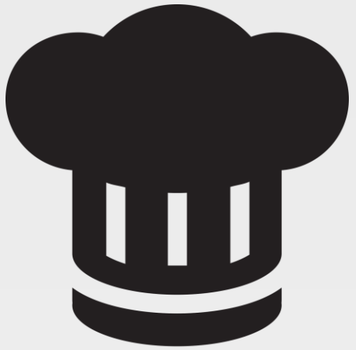
~/apache/attributes/default.rb

```
default['apache']['package_name'] = 'httpd'                    +
```

©2017 Chef Software Inc.

CHEF™

EXERCISE



Setup a Break Point

Time to pry into the code and see what it is going on.

Objective:

- ✓ Mutate the code and add the breakpoint
- ✓ Execute the tests to cause the breakpoint to trigger
- ✓ Remove the breakpoint and restore the code

CHEF

LAB

Refactor Remaining Resources

- ❑ Refactor the resource to use a Node attribute
- ❑ Execute the tests and verify the tests fail
- ❑ Add the new Node attribute
- ❑ Execute the tests and verify the tests pass

BONUS: Use pry to verify that the attribute has been set.

❖ **Repeat this series of steps for the configuration recipe and service recipe**

©2017 Chef Software Inc.

CHEF

Update the Recipe to use the Node Attribute

~/apache/recipes/service.rb

```
#
# Cookbook Name:: apache
# Recipe:: service
#
# Copyright (c) 2017 The Authors, All Rights Reserved.
service node['apache']['service_name'] do
  action [:enable, :start]
end
```

©2017 Chef Software Inc.

CHEF

Execute the Tests to See it Fail

```
> chef exec rspec spec/unit/recipes/service_spec.rb
```

```
FFF

Failures:

  1) apache::service When all attributes are default, on an Centos 6.9
converges successfully
     Failure/Error: expect { chef_run }.to_not raise_error

       expected no Exception, got #<ArgumentError: You must supply a name when
declaring a service resource> with backtrace:
         # /tmp/chefspec20180313-17746-
14gwtwpfile_cache_path/cookbooks/apache/recipes/service.rb:6:in `from_file'
```

©2017 Chef Software Inc.

CHEF™

Add the Default Node Attribute

~/apache/attributes/default.rb

```
default['apache']['package_name'] = 'httpd'
default['apache']['service_name'] = 'httpd'
```

©2017 Chef Software Inc.

Execute the Tests to See it Pass

```
> chef exec rspec spec/unit/recipes/service_spec.rb
```

```
...

Finished in 1.06 seconds (files took 4.33 seconds to load)
3 examples, 0 failures
```

©2017 Chef Software Inc.

CHEF

Update the Recipe to use the Node Attribute

~/apache/recipes/configuration.rb

```
#
# Cookbook:: apache
# Recipe:: configuration
#
# Copyright:: 2018, The Authors, All Rights Reserved.
file node['apache']['default_index_html'] do
  content '<h1>Welcome Home!</h1>'
end
```

©2017 Chef Software Inc.

CHEF

Execute the Tests to See it Fail

```
> chef exec rspec spec/unit/recipes/configuration_spec.rb
```

```
